Professional Software Engineer Experience

Generali Global Assistance February 2020 - Present
Full Stack Developer

- Writes code for a major identity theft product using React, Node, Contentful, and various AWS Services
- Re-developed landing page, enrollment flow, and credit report pages leading to major user experience improvements
- DRY-ed out code to use a private NPM package I wrote with AWS helper functions for Lambdas. Then I had to test all the Lambdas to ensure they still worked.
- Documented how to properly test all the Lambdas written in Node before a deployment.
- Team follows agile methodology

Attain November 2018 - January 2020
JavaScript Developer

- Worked on building a major product suite for the education consulting business using Angular 7, Node, and PostgreSQL
- Writes tests in Jasmine
- Conducted product research with a major client
- Made small tweaks to legacy code as needed
- Team followed a modified version of agile methodology

QOMPLX January 2018 - November 2018
Front End Web & JavaScript Engineer

- Developed the public site for our cybersecurity product in vanilla JavaScript
- Engineered features for the cybersecurity and trade products using AngularJS
- Built design system library across the company's products using Sass and Webpack 4
- Created universal sidebar library used in all the company's products using AngularJS and Webpack
- Worked with dev-ops on Jenkins deployments of public site
- Team followed agile methodology

Freelancer October 2017 - December 2017

- Worked with overseas developer team to fix bugs
- Consulted with the CEO on all technology-related issues
- Taught a 7th-grade robotics class

Crane.ai June 2017 - September 2017
Full Stack Developer Intern

- Built an easy-to-use React interface to allow internal employees to train Crane's AI system
- Wrote Node API calls to our internal AI
- Project managed a mobile app for an external client to by creating a specification document and daily check-in with the developers
- Wrote tests in Jest for core client software

Skills

Front End: JavaScript, React, Angular, TypeScript, Contentful, Webpack, Tachyons, Accessibility, Sass, Electron, Papaparse

Back End: NodeJS, ExpressJS, PostgreSQL, Heroku, Scala, MongoDB

Testing: Cypress, Jasmine, Jest, Mocha

Version Control: Git, BitBucket, GitHub

Amazon Web Services: Lambda, SQS, Code Build, Code Pipeline, CloudWatch

Open Source Contributions

Jasmine February 2019
Fixed some errors in their documentation

Swagger.UI November 2018
Refactored some of their code to remove a deprecated React Lifecycle

Facebook Jest September 2017
Created the official example in the documentation of how to use Jest with Webpack

Community Involvement

Grace Hopper Celebration Attendee 2020

- Helped over 25 other attendees with their resumes
